Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-10 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.

- 6) ☐ Other: ____.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Lim et al. (US 6,584,229 B1, hereinafter "Lim").

Regarding claims 1-5, 7, 9-10, Lim discloses a method of setting a region of interest in each of a sequence of video frames (method for macroblock-based object oriented coding of image sequence having a stationary background) comprising:

generating in respect of each video frame an instantaneous region of interest (foreground object region is distinguished; col. 2, lines 42-60);

determining whether to modify the region of interest set for the preceding video frame (dividing the stationary background region and the object region from an Inputted video in a macroblock-by-macroblock basis by using a difference between the previous frame and the current frame; col. 3, lines 48-51); and

setting the region of interest of the currently considered video frame in accordance with the result of the determination performed (object region is determined; col. 3, lines 43-51); wherein

the stepped procedure includes comparing a first boundary, or sections thereof, with a second boundary, or corresponding sections thereof, and if the difference is greater than a threshold amount, modifying the second boundary in the direction towards the first boundary (the step of dividing all macro-blocks as foreground object regions and background regions by comparing test statistics which is a difference between the pixel value of the macroblock of the current frame and that of the macroblock of the previous frame in the same position, with the predetermined threshold value; col. 4, lines 22-29).

Regarding claims 6 and 8, background region macroblocks are encoded at a low coding bit rate and the foreground object region macroblocks are coded by well-known macroblock coding technique (col. 2, lines 1-8; col. 3, lines 5-9, 20-31).

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Krishnamurthy et al. (US 6,496,607), Crinon et al. (US 2002/0191846 A1), Ohsawa et al. (US 2001/0019631 A1), and Bober et al. (US 2004/0070666 A1) show other method of setting a region of interest.
